MEMORANDUM FOR: Deputy Director for Administration

FROM:

[Redacted]
Director of Communications

Edward J. Maloney
Director of Information Technology

SUBJECT:

Joint Office of Communications and
Office of Information Technology
Strategic Objectives

1. The Office of Communications and the Office of Information Technology are pleased to publish their first set of joint strategic objectives which are attached. These objectives have grown out of numerous discussions, conferences and planning sessions held over the last several months.

2. Both Offices recognize the vital importance of developing a network which is responsive to the merging and growing communications and data processing requirements of our customers. We will use these joint objectives as the framework upon which future efforts are based. We will also review and update this document when appropriate on an annual basis in the September time frame.

3. We plan to distribute these objectives throughout our respective networks. While the objectives themselves are simply stated, their implementation is not. We will need the support of all those involved to ensure the success of our mutual goals.

OC AND OIT JOINT STRATEGIC OBJECTIVES

1. Provide the same level of information services in the Foreign Network and Domestic Network as in the Headquarters area.
2. Ensure that Domestic and Foreign Networks are designed and operated in the framework of a single integrated Agency information network architecture.
3. Ensure that appropriate training and professionally enhancing assignment opportunities are available, irrespective of organizational boundaries.
4. Establish and implement appropriate communications security programs, policies, and procedures for foreign and domestic communications activities.
5. Enhance the survivability of the communications network through the implementation of the nodal concept in the domestic network and a base station expansion program in the foreign network.
6. Jointly develop Agency positions on National level telecommunications issues.
